

AFS GUIDANCE & STEERING AgGPS EZ-Steer 500 Assisted Steering System

Simple, portable hands-free farming

- **Fits more than 600 old and new vehicle models**
- **Turns the wheel for you** by combining a friction wheel and motor with GPS guidance from AgGPS® EZ-Guide® 500 or EZ-Guide 250 lightbars
- T2 Terrain Compensation Technology **improves accuracy** when driving straight lines across sloping terrain
- **Leaves you free to focus** on other tasks, such as sprayer and planter performance
 - **Improves job quality and crop yields**
 - **Reduces fatigue**

AgGPS EZ-Steer 500 Assisted Steering Components

System includes:

- **Foot switch** to engage/disengage the system – for **hands-free farming**
- Motor that **receives electrical signals** from AgGPS EZ-Steer® controller and converts to **precise steering commands**
- **Controller** that uses data from GPS receiver to **send instructions to the motor**
